**Article 3 (best interests of the child)** The best interests of the child must be a top priority in all decisions and actions that affect children.

**Article 6 (life, survival and development)** Every child has the right to life. Governments must do all they can to ensure that children survive and develop to their full potential.

**Article 24 (health and health services)** Every child has the right to the best possible health. Governments must provide good quality health care, clean water, nutritious food, and a clean environment and education on health and well-being so that children can stay healthy. Richer countries must help poorer countries achieve this.
